

Scotchgard™ Protector

Leather is luxurious. Scotchgard™ Protector for leather helps keep Townsend leather looking beautiful longer. Making oil and water-based spills bead up. Resisting water spots. And simplifying cleaning. All while preserving the feel, breathability and natural softness that is leather's alone.

creative interior solutions

Townsend Leather knows that today's interior design customers demand beauty and performance. More active and educated than ever, they expect their leather interiors to compliment their lifestyles. And they believe that technology can make their lives easier and more comfortable. Scotchgard™ Protector is a natural for these expectations, turning leather into a high performance material - without affecting its rich natural look and feel.

Trusted. Progressive. Global.

How many brands can claim 96% consumer awareness? Not many. Yet, this is the level of familiarity the Scotchgard™ Brand name has achieved in its more than 50 years of existence.

Scotchgard™ Protector for leather makes water and oil-based spills bead up and wipe away easily.

Once stained, leather loses its style and sophistication.

Townsend engineers Scotchgard™ Protector into the leather, providing excellent resistance to water and oil-based stains even if the surface is abraded.

Today's Scotchgard™ Protector is different. It sets the standard for environmental leadership. And as part of 3M's presence in more than 60 countries around the world, it has truly become a global brand.

Find out how Townsend Leather with Scotchgard™ Protector can meet the demanding expectations of your customers by contacting us at www.townsendleather.com.
