

PRANA COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

An aniline-dyed, natural grain cowhide that has very light and subtle finishes that highlights the smooth grain of this select hide.

CHARACTERISTICS:

Being a natural product, Prana will exhibit some natural characteristics such as healed scars, veins, neck wrinkles, and grain variation throughout a hide and from hide to hide.

Super softness.

Durability and built-in protection from soiling, fading, and wear.

A semi-matte sheen which lends beauty to the relaxing and calming colors offered.

Natural variation in grain texture throughout the hide and from hide to hide.

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

B: Loose grain is characterized by large "breaks" in the density of the grain visible on the surface of the hide. Generally-speaking, loose grain is often found towards the perimeter of a hide.

C: Characteristic wherein the grain structure visible on the surface of the hide is more uniform and "tight." Tight grain is generally preferred and found more consistently towards the interior of the hide.

D: Characterized by many clearly visible blood vessels, either closed or cut open by splitting or shaving operations.
