

STRIATIONS COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Striations Cowhide is a full-aniline cowhide that receives a hand-painted technique inspired by the texture, pattern and effects of modern art.

Various colors hand-brushed are applied to each section of leather creating tonal depth and revealing a nuance that is rich yet subtle.

CHARACTERISTICS:

The characteristic finish effect of this leather artwork is applied by hand; the resulting variance in design and color are part of its natural beauty. With the hand-crafted nature of this product, variation in color and texture should be expected as part of the natural beauty of this leather.

As an Aniline leather, Striations Cowhide does not have the full coverage of a pigmented formula as a Finished leather does; there will be natural variations in color, tone, and texture and each hide's unique history and natural markings will be highlighted.

As a Hand-Rubbed leather, there will be some variation in coloration and boldness of the tipping effect within a hide and from hide to hide.

A sample is not necessarily representative of the overall effects of this leather.

Due to lack of full finish coverage, this product type is subject to more soiling, fading, and wear.

A: Striations is an Aniline leather, with no surface pigments; there will be natural color shading within a hide and from hide to hide.

B: Striations Cowhide is a Hand-Rubbed leather, therefore there will be some variation in the coloration and boldness of the rubbed effect within a hide and from hide to hide.

C: Natural variations in color, tone and grain texture will be highlighted from the hand-rubbing. The resulting variance in design and color are part of its natural beauty.

VARIATION IN HAND-RUBBING
