

QUILTING & PERFORATING

Townsend Leather recently acquired state-of-the-art machinery which allows us to create standard and one-of-a-kind pattern seat inserts and panels featuring decorative designs made through a combination of technical stitching and custom perforation. This unique process uses both thread and hole punches to create beautiful designs. Quilted Leathers can be produced on any one of Townsend's In-Stock, standard, or custom colored leathers and the whole process is completed at Townsend's Upstate New York facility with quick turn times and attention to finest quality. We are generally able to provide customized samples to your specifications but there will be a fee to cover the costs for these. Lead time and cost for samples vary from project to project. Your Townsend Leather Customer Service rep will be happy to provide a quotation for both sample and production orders, working alongside with you on the details of your project.

QUILTING & PERFORATING DETAILS

- Available Panel Sizes: 28"x28", 38"x28"
- Maximum quilting area of 26"x26", 36"x26"
- Thread & leather colors can be selected from Townsend's library
- Leather is stitched onto a layer of foam in 1/2" or 1/4" thickness
- Quilting patterns can be designed with or without Perf holes
- Digital renderings can be requested to see different leather and thread combinations
- Physical samples or Strike-Off samples may be subject to fees depending on design

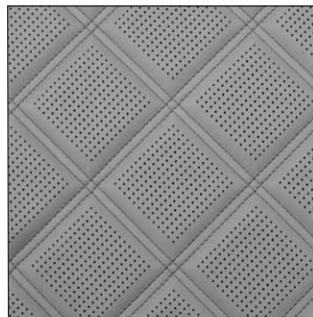

QUILTING AND PERFORATING PROVIDES GREAT RESULTS FOR PRECISE AND VISUALLY DECORATIVE PATTERNS

ARTWORK REQUIREMENTS

- Submit artwork at 100%
- Accepted File Formats: Auto CAD DXF, Adobe Illustrator (AI), AAMA/ASTM, TIPP, HPGL, or Encapsulated Postscript (EPS)
- Repeated Designs: If artwork is a repeated design, be sure it repeats properly in the direction you wish taking into consideration necessary wrap requirements.

Townsend Leather has an highly experienced Graphic Design Department that will assist you through the process. Charges may apply for customizing artwork and support.
